Vertical steam sterilizer equipped with wheels

NEW DATA PROCESSING TRANSMISSION SYSTEM

**SD Card
Incorporated**

STANDARD FEATURES

Automatic water filling with button and suction pump of distilled water

Vacuum pump up to three peaks

Safety valves to prevent overpressure

Safety thermostat

Electronic Check-control of each function

Removable stainless steel basket

Water level float

PT100 probe for temperature detection

Drain cock

Minimum level signal of water in the chamber

Printer predisposition

Possibility of PC connection

Removable tank of used water

Extraction of steam/air residual with vacuum pump

TECHNICAL FEATURES

Power supply 230 V – 50 Hz

Power 2500 Watt

Boiler dimensions Ø237 x 530

Dimensions of the autoclave 48x38x95 cm (WxDxP)

Working pressure Mbar 3180 – 2180

Chamber capacity 23 Lt

Water pressure exceeding 2 bar

SD Card Incorporated

STANDARD EQUIPMENT

Stainless steel basket

Vials holder

Cleaning sponge
